

## **Battery Filling Systems Appoints Jim Davis as Director of Engineering**

*Clemmons, NC* – Battery Filling Systems appointed Jim Davis as Director of Engineering and Quality Control. Though new to the material handling industry, he brings more than twenty years of experience in Engineering.

Davis began his career in 1981 as a Chemical Engineering graduate from North Carolina State University. He worked at Burlington Industries in research and development and is the holder of several patents. He also assisted in the startup and operation of a highly automated photographic manufacturing plant for Konica.

Davis is an exceptional leader with a broad range of experience in engineering, quality control and computer science. He is responsible for new development, technical services, and quality control at Battery Filling Systems.
